METRICS
for Nonprofit News Organizations
DEVELOPING IMPACT METRICS FOR NONPROFIT JOURNALISM PROJECTS is no simple matter. Over the past several years, foundations, researchers and nationally recognized investigative newsrooms have all waded into the fray, offering competing models and arguments for and against. In the end, impact assessment comes down to a dialogue—about goals; how news informs, connects and engages communities; and how best to maintain journalistic integrity in the process.

That’s why we’ve created this guide, which features both conceptual perspectives for foundations and nuts-and-bolts advice for nonprofit news organizations. We hope you’ll begin by reading the side that’s most relevant to you, and then be drawn into the conversation by reading the other side. We also hope it sparks dialogue about your own projects—among staff, and between foundations and newsrooms.

Text by Jason Alcorn & Lauren Furhman

Jason Alcorn is a multimedia journalist who leads technology projects and online strategy for Unicef, The Conservation Fund, and eBay, among others. His writing has been published by The Washington Post and Americas Quarterly, and his documentary video by Forbes.com.

Lauren Fuhrmann has worked for the Wisconsin Center for Investigative Journalism since 2011. She previously researched audience engagement as a social media intern for Harvest Public Media and spent two years as a multimedia reporter for KBIA 91.3 FM and the Columbia Missourian.

p 13  Tell Your Story

p 14  Wrap Up: Do’s & Don’t’s
You’re at your desk working on a proposal for a grant that could transform your organization. It might give you the money to hire a new staff reporter or add an events manager. It might underwrite a series of stories on a critical topic or provide general operating support.

And then you get to the part of the proposal that asks how you will measure the impact of your project.

How do you answer that question?

It may seem nearly impossible. The time frame of the grant seems too short for your grand vision. And you don’t know what news you’ll publish in the next 12 weeks, much less the next 12 months. Democracy itself depends on journalism, you might think.

Fortunately, there are some templates to follow. In this guide, we give you concrete examples and recommendations based on our own experience writing successful proposals—and successful grant reports—that have brought more than $1.5 million to our nonprofit newsrooms.

Let’s get started!
GOOD IMPACT MEASUREMENT STARTS WITH A CLEAR MISSION. PUT EVEN MORE simply: What problem was your organization founded to solve, and how do you solve it? That’s the standard you hold yourself up against at the end of every year and measure how much progress you’ve made.

JASON: At INVESTIGATEWEST, our mission is to build a powerful citizenry in the Pacific Northwest. We do that through consequential storytelling.

LAUREN: At the WISCONSINCENTERFORINVESTIGATIVE JOURNALISM (WCIJ), we foster an informed citizenry and strengthen democracy. We do that by increasing the quality and quantity of investigative reporting in Wisconsin, while training current and future generations of investigative journalists.

You probably have an official mission statement, and unless you’ve reviewed it lately, it’s probably long with a bunch of fancy words in it. Take our advice and use the plainest language you can.

Along with a mission, you also need what people in the nonprofit and foundation world call a “THEORY OF CHANGE.” Your theory of change is the arrows you draw between your organization’s activities, the outcomes of those activities, and—ultimately—the impact.
Sometimes the arrow is short and direct. You publish a story that is read by a legislator who passes a new law. That’s an easy story to tell, but it’s sure hard to promise to a funder, so it’s not a great answer to that all-important impact question.

In the rest of this guide we’ll show you patterns for each step of your theory of change that you can use with foundations to make the case that you—yes, you!—are a brilliant investment.
IN FOUNDATION LANGUAGE, WHO ARE YOUR “CONSTITUENTS”? JUST LIKE HAVING a clear mission and theory of change, knowing who you serve is one of the building blocks of an effective evaluation framework for nonprofit news.

If you’re a local newsroom, you serve a geographic market. How many people live in your city or your region? If you specialize in political reporting, how many lobbyists, staffers, lawmkaers and politicos are around? If you specialize in a particular topic, like education or health, what is the potential audience for your work? News organizations—nonprofit or otherwise—can’t thrive if they try to be all things to all people.

The more you can define your target audience, the better you can estimate its size, and how many you’re reaching. Just like a business, your goal is to get as much market share as possible.
Getting Specific: Evaluating Your Impact

In this guide, we'll help you evaluate the impact of your work through three lenses: *What did you do? Who did you reach? What happened?*

Before we get started, open up your calendar and set a recurring weekly reminder to gather and analyze your organization’s metrics. Set another recurring reminder to review the metrics you gather on a quarterly basis to determine if you’re looking at the right numbers. It’s easy to put these tasks off when you’re faced with a constant barrage of fundraising deadlines and editorial work, but if you keep up with it week by week, when grant report time rolls around, you can spend your time thoughtfully reporting your impact, rather than hustling to find all of the different numbers from the various sources.

The information you gather should be shared on a regular basis with staff members, whether it’s in a weekly email update or discussion at staff meetings.

Goal Setting: What Did We Do?

The first question you want to answer is: *What did we do? Or, in other words, what did we cover?* The answer will include a total number of stories and details of that coverage—how many stories did you produce? What communities did you cover? What topics did you focus on?

The easiest way to do this is by establishing an internal list of stories. Your content management system may have this capability, but if not, a Google spreadsheet will do the job.

Update it on a weekly basis, including the following information:

- slug
- run date
- headline
- reporter(s)
- partner/collaborations: Keep track of who you worked with and the nature of the collaboration. Did you split the work evenly? Did a newspaper provide images for your story? Was it a tip from a news organization lacking the resources to complete the story?
subject or categories (i.e. education, environment)  
market/geographic location  
any other characteristics that are critical to your coverage goals (minority communities covered, neighborhoods, etc.)  
story elements, such as multimedia, interactive databases, etc.

Finally, you should track the quality of your work as recognized by others. Receiving awards and honors for stories proves to your funders, readers and supporters that you are producing professional, high-quality coverage. Keep track of any instances in the same spreadsheet or a detailed page on your website.

InvestigateWest has won nearly three-dozen journalism awards since we began publishing in 2010.
There are two main ways that many nonprofit news organizations reach their target audience. The first is **DIRECT DISTRIBUTION** through your website and social media channels. The second is **PARTNER DISTRIBUTION**, or distribution through partner news organizations. Each is tracked differently, but together they give a general view of who you reached.

**Direct distribution**

To track growth and changes over time on your website, pull the numbers you care about on a regular (weekly is ideal, monthly is okay) basis and compile them in a “digital dashboard” spreadsheet. The exact numbers should be tailored to your organization’s goals, but may include pageviews, sessions and/or users, and engagement action analytics, like polls, interactive databases and photo galleries. More details on web metrics and what they mean can be found in our previous guide, *Web Metrics: Basics for Journalists*. If you use Google Analytics, you can set up a custom dashboard that’s e-mailed to you weekly.

This digital dashboard should also contain social media and other engagement tool analytics. Track Facebook fans, Twitter followers, and email newsletter subscriber growth, and any metrics that are important to your engagement strategy (*i.e.*, Twitter retweets, FB shares, newsletter open and click through rates, etc.).

Your spreadsheet might look something like this:
NewsLynx

NewsLynx (newslynx.org) is a tool that helps you categorize stories, connect them with mentions in Google Alerts, Facebook, Twitter and other sources, and gather basic Google Analytics, Facebook and Twitter metrics. It was built by Michael Keller and Brian Abelson while they were fellows at the Columbia Tow Center for Digital Journalism. It’s still in beta testing now, but stay tuned. It may be more widely available to nonprofit news organizations by late 2015.

Partner distribution

Use two different spreadsheets to track the use of your content by other news organizations.

1. Story tracker: a list of the stories that ran in your partners’ media channels
2. Partner organizations: a list with details about your partners

STORY TRACKER

The data you gather for the story tracker spreadsheet should include information about how your partners used your content, including:
### PARTNER ORGANIZATIONS

This list should include descriptive information about your partners that will help you analyze who you have—and who you don’t. Include the following:

- **name**
- **type**
- **location (city, state)**
- **affiliation**
- **overall reach**, e.g., monthly sessions/pageviews/unique visitors; circulation and ratings

#### slug (the same slug used in your internal story list)
- **date**
- **partner organization**
- **headline**
- **url or link**
- **pageviews**
- **column/editorial**
- **sidebar**
- **photo**

#### graphic
- **other multimedia**
- **[Your organization] mentioned?**
- **customized/localized?**
- **print**
- **web**
- **radio**
- **TV**
- **comments**
Now it’s time to populate your story tracker. The way you distribute your content will determine how you should track its use.

**Jason:** At InvestigateWest, we work with more than a dozen media partners to produce and distribute our stories in the Pacific Northwest.

**Lauren:** At WCIJ, we give our content away for free to news media in Wisconsin. More than 230 news organizations have used our content. Partners log in to our website and download what they want to use. To estimate the size of our reach, we search for pickups and citations of our work online, in print and broadcast.

If you have content agreements with a small number of organizations, like InvestigateWest, try to establish a relationship with their analytics staff to request pickup details and metrics on your content on a regular basis. You can accomplish this by calling or emailing each person to request specific numbers, or sharing a Google Form for them to fill out that will feed into a Google Spreadsheet.

If they provide web analytics by story, keep track of those in the “Story tracker” worksheet. Otherwise average monthly pageviews, circulation and broadcast details can be kept in the “News organization” database. For partners, the number of pageviews isn’t as important as who the partner is and the implied audience it reaches.
If you have too many partners to request analytics from each, it’s time to get searching! Set up **Google Alerts** for all variations of your name, reporters’ names and story-specific keywords. To find results that Google Alerts may miss, search for the same keywords on different search engines and the top 10 news sites that use your content.

Alternatively, if you have the budget for it, use a paid clipping, or media monitoring, service like **Meltwater** and **Vocus**. Media mentions will be compiled for you, along with audience estimates from ComScore and Compete.

You should also check with newspaper associations in your area to see if they offer print monitoring or a searchable archive of their member newspapers.
We’re going to shift away from quantitative analytics and talk about story vectors, i.e., news with a direction and a velocity. You want to prove to your funders that your work is contributing constructively to the conversation and moving public opinion and policy.

Anecdotal evidence of impact that resulted from your work should be compiled in a spreadsheet or database similar to, and ideally linked to, those you’ve already created.

One strategy to compile these anecdotes is an online form shared with all staff members to submit examples of impact. One example is CIR’s Outcome Tracker (shown on the left).

You might want to try classifying these qualitative indicators with the OFFLINE IMPACT INDICATORS GLOSSARY developed by the Center for Investigative Reporting, together with Columbia University’s Tow Center for Digital Journalism and the Media Impact Project. The glossary is currently available on the Media Impact Project’s website at bit.ly/impactglossary.
NOW YOU HAVE A BUNCH OF DATA THAT YOU CAN ANALYZE ALL TOGETHER— WHAT you covered and how much, who you reached and where, and some anecdotes and other indicators on the types of impact you had.

Because much of this data has some type of geographic tag and is in spreadsheets, you might want to try mapping it out using a tool such as **BATCHGEO**. All it takes is copying and pasting the data you want to map from a spreadsheet and adjusting the settings. Use this to map where your stories have been cited or picked up and what geographic locations your work has focused on.
READY TO FUND YOUR NEWS ORGANIZATION? HERE’S A QUICK CHEAT SHEET:

Do use tools and templates that make data gathering and interpretation easier.

Do make a recurring appointment on your calendar to keep data gathering manageable.

Do set benchmarks and goals, and look at both trends and totals.

Do help your entire team understand and discuss the data you’re gathering—and why.

Do tell a story—your story—with the data that really matters for your organization.

Don’t data dump. Every report should have a sentence or two highlighting what’s important—good or bad.

Don’t just gather quantitative data. Sometimes it’s an e-mail or a mention in a certain publication that really indicates the impact you’ve had.

WRAP UP: DO’s & DON’T’s
THE JOURNALISM IMPACT PLANNING GAUGE

The methods that funders and newsrooms use to assess the impact of journalism projects depend on the goals that they define. Some goals require that evaluators pay attention to the newsroom’s internal dynamics, others focus mainly on one-way dynamics of audience reach and responses, and still others take into account two-way or multi-level relationships that define what we can “story-vectors” between content, issues, stakeholders and institutions.

- **internal**
- **two-way**
- **one-way**
- **multi-level**
